31405	Enhancement	Import - Standard (Digital Assets)	The asset height and width columns are modified to restrict zero as the value.	Generic	2.1.17.55	9/7/2023
31412	Enhancement	Imports - Standard (Parts without line code)	<ol style="list-style-type: none"> 1. Included an optional field called "Part Status" to modify the part status to either Active, Discontinued or Proposed. 2. The status will be defaulted to "Active" if a specific value is not provided. 	Generic	2.1.17.55	9/7/2023
31413	Enhancement	Reports - Parts Segment Report	All part level reports that can be downloaded from this module are modified to include the ERP# associated with the part.	Custom	2.1.17.55	9/7/2023

RELEASE NOTES

31440	Enhancement	Import - Custom (Associated Parts)	A new template to associate a substitute, related and/or add-on parts to the primary part is introduced.	Generic	2.1.17.55	9/7/2023
31441	Enhancement	Reports - Associated Parts	A new report "Associated Parts" is included to the Parts Segment report to obtain the list of all associations (substitute, add-ons, related parts) added to the parts.	Generic	2.1.17.55	9/7/2023
31505	Enhancement	Reports - Vendor Score Card	The file information report is modified to capture only the last 6 months' data. The file alert check report is modified to capture the data only adhering to the date range specified.	Generic	2.1.17.55	9/7/2023
31549	Enhancement	Report - Customer Specific	Regenerated the custom quarterly report generated based on the feedback from customer	Custom	2.1.17.55	9/7/2023
31620	Enhancement	Parts - PIES Notes	New custom description codes are added to the PMT to capture marketplace specific descriptions.	Generic	2.1.17.55	9/7/2023
31683	Enhancement	Imports - Standard (Parts without line code)	1. Included an optional field called "Part Status" to modify the part status to either Active, Discontinued or Proposed. 2. The status will default to "Active" if a specific value is not provided.	Generic	2.1.17.55	9/7/2023
16389, 30391	Enhancement	Import - Standard (Price)	Fixed the issue with price import not allowing the users to upload price for same price type with different currency code.	Generic	2.1.17.54	8/4/2023

RELEASE NOTES

28513	Enhancement	Reports - Parts Segment Report	The Multi-level Custom Category report is moved from the Reports > Utilities menu and is added as a report type under the Parts Segment Report.	Generic	2.1.17.54	8/4/2023
28514	Enhancement	Reports - Parts Segment Report	The Parts Status report is moved from the Reports > Utilities menu and is added as a report type under the Parts Segment Report.	Generic	2.1.17.54	8/4/2023
28562	Enhancement	Import - Custom Parts	Import customization to create a new part in the PMT if a discontinued part is being imported with a new suffix code.	Custom	2.1.17.54	8/4/2023
28780	Enhancement	Import - Standard (Price)	The date formats other than YYYY-MM-DD are restricted as per AutoCare standards.	Generic	2.1.17.54	8/4/2023
29266	Enhancement	Parts - Application	A feature to look into the available years for any YMM that is already associated with the part and to extend the coverage to the same	Custom	2.1.17.54	8/4/2023
29452	Enhancement	Parts - Custom Parts	A poke-yoke task to improve the performance of the page is done. The BigC Title and the BC Size attributes are moved from the Item tile to their respective tiles.	Custom	2.1.17.54	8/4/2023
29470	Enhancement	Reports - QDB	Options to view the list of parts associated with the QDB note and an option to export the same is introduced. Additionally, an option to edit the notes on the same tab is introduced.	Generic	2.1.17.54	8/4/2023

RELEASE NOTES

29622, 29624, 29666, 29780	Enhancement	Reports - Vendor Score Card	A new report to analyze the health of the data received from the vendors is introduced. The report allows the users to get vendor health data at the file level, part level is introduced. Additionally, a report to check the aging of files is introduced.	Generic	2.1.17.54	8/4/2023
29748	Enhancement	Reports - QDB	An option to do a bulk export of the notes from the QDB report is introduced.	Generic	2.1.17.54	8/4/2023
29825	Defect	Dashboard	Clicking on the "Parts Not Linked" report from the dashboard will not redirect to the Dropped Parts reports.	Generic	2.1.17.54	8/4/2023
29875	Defect	Reports - ACES Invalid	Fixed the issue with the ACES Invalids report downloading an empty file while accessed through the dashboard.	Generic	2.1.17.54	8/4/2023
29920	Enhancement	Parts - Quick Add	Since the "Add" button encompasses all the fields that are available for a part creation, the "Quick Add" button is discontinued from the PMT.	Generic	2.1.17.54	8/4/2023
29921	Enhancement	Parts - List All - Duplicate Part	A help text indicating the functionality of the duplicate part feature is included in the pop-up that captures the destination part.	Generic	2.1.17.54	8/4/2023
29922	Enhancement	Parts - Add Part	Fixed the issue that displays the "No Records Found" error message when a new part is added to the PMT.	Generic	2.1.17.54	8/4/2023
29923	Enhancement	Parts - List All - Delete Part	Reworded the alert message displayed upon clicking on the delete icon for better clarity.	Generic	2.1.17.54	8/4/2023

RELEASE NOTES

29926	Enhancement	Export Data - Marketplace Exports	The marketplace exports such as Amazon ACES, Walmart ACES/PIES, etc., will now be displayed only depending upon the configuration.	Custom	2.1.17.54	8/4/2023
29948	Defect	Parts - List All - Duplicate Apppart	Fixed the issue with the duplicate apppart feature displaying irrelevant applications.	Generic	2.1.17.54	8/4/2023
29951	Enhancement	Import - Standard (Application) Export - Standard (ACES related)	A new action code "C" is included to the template to specify if an existing application is being modified. Included a new field "ApplicationDataExtractedID" which is made mandatory during modifications/deletion of an existing application.	Generic	2.1.17.54	8/4/2023
29979	Enhancement	Parts - List All - Duplicate Apppart	Included additional columns - Options and Notes to the grid displaying applications when duplicating the apppart.	Generic	2.1.17.54	8/4/2023
29981	Defect	Import - Standard (Interchange)	Fixed the issue with new interchanges being created upon import which should not have happened per customization. The root cause was that the custom brands were not considered in the validation that led to creation of interchanges.	Custom	2.1.17.54	8/4/2023
29982	Enhancement	Export Data	Modified the screen to display only the part descriptions applicable to the logged in user.	Custom	2.1.17.54	8/4/2023
29989	Enhancement	Import - Standard (Interchange)	The headers in the import template are modified for better clarity.	Generic	2.1.17.54	8/4/2023

RELEASE NOTES

30052	Enhancement	Master - Product Line	Modified the screen to capture the Opticat Product Line and Opticat Product Name specific to ACES and PIES for every product line available in the PMT. This is to enable data push directly from the PMT to the Opticat Onboard portal eliminating manual efforts.	Generic	2.1.17.54	8/4/2023
30053	Enhancement	Import - Standard (Parts)	The status message being displayed during import of parts with custom part description is modified for better clarity.	Generic	2.1.17.54	8/4/2023
30148	Enhancement	Settings	The dropdown displaying the list of users added to the PMT is modified to display both the First and Last Names.	Generic	2.1.17.54	8/4/2023
30194	Enhancement	Import - Custom (Parts)	Logic changes to the import to create new parts in PMT if an existing part number in discontinued status is imported with a different suffix code.	Custom	2.1.17.54	8/4/2023
30210	Enhancement	Parts - Application (Buyers Guide)	Fixed the cosmetic issues on the Applications page (previously known as Buyers Guide) that appears when more that 500 results are available for the search.	Custom	2.1.17.54	8/4/2023
30211	Enhancement	Import - Standard (Application)	Enabled the check-box that lets the users prevent the non-ACES applications being imported to the PMT.	Generic	2.1.17.54	8/4/2023
30227	Enhancement	Queue and Downloads Page	Fixed the issue with mismatch of the username during XML import on the Queue vs Downloads page.	Generic	2.1.17.54	8/4/2023

RELEASE NOTES

30267	Enhancement	Import - Custom (Wheel Atlas)	Logic changes to populate the Brand Name in the categories and description based on the Brand provided in the import rather than the Brand ID.	Custom	2.1.17.54	8/4/2023
30352	Enhancement	Import - Standard (Application)	Increased the field size of the application attribute columns and allowed multiple values to be provided separated by comma. The same is specified in the data guidelines of the template.	Generic	2.1.17.54	8/4/2023
30392	Enhancement	Parts - Application (Buyers Guide)	Modified the working of the Add/Edit Applications page on the Parts tab to allow edit of MFR Label and the Notes fields despite the Show Attributes enabled/disabled.	Generic	2.1.17.54	8/4/2023
27844	Enhancement	Export - Amazon XML	The Amazon XML export is modified to capture the custom changes made to the component-based ACES XML i.e., to inherit the unique applications from the unit parts.	Custom	2.1.17.53	6/28/2023
28866	Enhancement	Import - Standard Template (Digital Assets, Parts)	Modified the date related fields in the Parts and Digital Assets excel import to capture the date in yyyy-mm-dd format. Any other format will be rejected.	Generic	2.1.17.53	6/28/2023
29088	Enhancement	Export - Interchange-based ACES and PIES - Excel and XML	The Interchange based export is modified to select more than one interchange for the export. Additionally, when a customized Interchange name is provided during the same, the same will be displayed in the drop-down	Generic	2.1.17.53	6/28/2023

RELEASE NOTES

29090	Enhancement	Import - Standard Template Processing (Interchange)	The Interchange - excel import template processing is modified to capture customer-specific Interchange Name based on the "Brand Label" column imported in the file.	Generic	2.1.17.53	6/28/2023
29177	Enhancement	Database	All tables in the database are modified to include the status as "Deleted" when a part is deleted from PMT.	Generic	2.1.17.53	6/28/2023
29303	Enhancement	Master - Interchange Name	The field to capture the customer-specific Interchange Name is introduced. This can be associated with an AutoCare brand label or can be standalone.	Generic	2.1.17.53	6/28/2023
29305	Enhancement	"Parts - Interchange Reports - Interchange My Catalog"	The Interchange Name related fields on the Parts - Interchange Page, Reports and My Catalog Segments are modified to capture the customer-specific interchange name.	Generic	2.1.17.53	6/28/2023
29418	Enhancement	Query Optimization	The queries pertaining to the Parts Import, Customized Parts Import, Customized Parts Report for improving performance.	Custom	2.1.17.53	6/28/2023
29420	Enhancement	Excel - Standard Templates (All Templates except Parts and Application)	The Part Terminology Name is made optional in all import templates except Parts and Application.	Generic	2.1.17.53	6/28/2023
28087	Enhancement	Parts - Buyers Guide	A user interface to view the custom attributes associated at an application + part (apppart) level is introduced.	Custom	2.1.17.52	6/8/2023

RELEASE NOTES

28693	Enhancement	Reports - ACES Viewer - VCDB and Equipment	Improvements to ACES Viewer to view include Base Vehicle ID in Vehicle and Equipment tabs.	Custom	2.1.17.52	6/8/2023
28844	Enhancement	Reports - ACES Viewer - PADB	Changes to PADB tab to search based on attribute or part terminology is included	Generic	2.1.17.52	6/8/2023
27087	Defect	Reports - ACES Viewer - PADB	Fixed the issues with the latest attributes not visible in the viewer	Generic	2.1.17.52	6/8/2023
28134	Enhancement	Import - ACES and PIES Excel and XML	The ACES and PIES import processing is modified to capture the sub-brand information imported.	Generic	2.1.17.52	6/8/2023
28210	Enhancement	"Import - Custom Parts Template Parts - Customized Parts"	The price-related fields on the custom parts template and the customized parts UI page are modified capture 0 prices.	Custom	2.1.17.52	6/8/2023
28216	Enhancement	Parts - Brand	The Brand segment on the Parts page is modified to capture the Sub brand information associated with the brand.	Generic	2.1.17.52	6/8/2023
28217	Enhancement	Export - Export Data	The export data page is modified to capture the sub-brands that are associated with the selected Brand(s).	Generic	2.1.17.52	6/8/2023
28489	Enhancement	Report - Parts Segment Report	Introduced an option to export the report with only the parts with an ERP part number.	Custom	2.1.17.52	6/8/2023

RELEASE NOTES

28490	Enhancement	Parts - Attribute	A new custom attribute "BC Price Profile" is included in the Custom Parts, Parts - Attributes and Custom Parts Import.	Custom	2.1.17.52	6/8/2023
28580	Enhancement	Master - Marketing Copy	Updated the Market Copy Digital Assets to capture assets of PDF file format.	Generic	2.1.17.52	6/8/2023
28799	Enhancement	Parts - Interchange	The grid on the Interchange segment of the Parts page is modified to capture the "Internal Notes"	Custom	2.1.17.52	6/8/2023
25668, 27244	Enhancement	Import - Standard Template	Included Part Terminology Name column in Import Templates - BOM, Digital Assets, Extended Info, Interchange, Package, PIES Notes, Price, Product Attributes	Generic	2.1.17.51	5/18/2023
27238	Enhancement	Import - Excel Import Processing	Changes to the excel import processing to process records based on Part# and Part Terminology combination for the given product line.	Generic	2.1.17.51	5/18/2023
27245, 27432	Enhancement	Exports - PIES Excel Reports - Parts Segment Report	Included the Part Terminology Name column to PIES excel and Parts Segment Report to retain the same format as that of the imported template.	Generic	2.1.17.51	5/18/2023
27359	Enhancement	Exports - All Application, ACES with QDB and ACES with Raw Notes Excel and CSV	The export files are updated to capture the custom application label-value pair to capture the imported customer-specific application attributes.	Custom	2.1.17.51	5/18/2023
27362, 28020	Enhancement	Import - Application Excel	The application import template is modified to capture the custom application label-value pair to capture the customer-specific application	Custom	2.1.17.51	5/18/2023

RELEASE NOTES

			attributes to be imported to the PMT.			
27383	Defect	Parts - Buyers Guide	Fixed the issues with not being able to delete the applications from the Buyers Guide page which occurred due to coding error.	Generic	2.1.17.51	5/18/2023
27427	Defect	Import - Excel Import Processing (Attributes)	Fixed the issues with not being able to upload the attributes template to the PMT which occurred due to imports to the speed up of the import process.	Generic	2.1.17.51	5/18/2023
27574	Defect	Downloads Page	Modified the Downloads page to wrap the filename to retain the visibility of other columns on the page.	Generic	2.1.17.51	5/18/2023
27575	Defect	Reports - ACES Viewer	Fixed the PADB viewer in the ACES Viewer to display the latest allowed attribute values as per the current PADB version.	Generic	2.1.17.51	5/18/2023
27626	Enhancement	Import - Standard Excel Template (Product Attributes)	Renamed the template from "Product Attribute without Part Type" to "Product Attribute".	Generic	2.1.17.51	5/18/2023
27754	Enhancement	Parts - Buyers Guide	Modified the Buyers Guide page of the PMT to display the grid only when there are 500 or fewer records. A message stating to refine the search filters to view the data on the grid will be displayed if there are 500+ records associated with the part.	Generic	2.1.17.51	5/18/2023
27792	Enhancement	Reports - Unit Component Report	A custom report to export the unit-component mapping imported to the PMT is included.	Custom	2.1.17.51	5/18/2023

RELEASE NOTES

27822	Enhancement	Export - PIES	Modified the digital assets export to include the assets from the sub-product line for the selected base#.	Generic	2.1.17.51	5/18/2023
27842	Defect	Parts - Digital Assets	Fixed the issues with image thumbnails not appearing on the Digital Assets section due to restricted folder permissions in the server.	Custom	2.1.17.51	5/18/2023
27848	Defect	Reports - Oversize Report, Dropped Part#, ACES Invalid	Fixed the issues with these reports to make them accessible.	Generic	2.1.17.51	5/18/2023
27978	Defect	Parts - Buyers Guide	Fixed the issues with the "Validate All" button on the Buyers Guide page which was previously validating only records with certain application IDs.	Generic	2.1.17.51	5/18/2023
28009	Enhancement	Import and Export - Application	Changes to the Application import and export templates to capture the customer-specific application attributes.	Custom	2.1.17.51	5/18/2023
28063	Defect	Parts - Buyers Guide	Fixed the issues with the sub model appearing more than once in the Options column of the grid.	Generic	2.1.17.51	5/18/2023
28066	Defect	Parts - Parts Summary Page	Fixed the timeout error occurring upon adding a new part due to restricted timeout period.	Custom	2.1.17.51	5/18/2023
28131	Enhancement	Parts - Attribute, Custom Parts, Freight, Custom Parts Template	Included a new code for the custom attribute across all applicable fields	Custom	2.1.17.51	5/18/2023

RELEASE NOTES

26770	Enhancement	Parts - All Pages	Updated the data type of the description-related fields in the PMT to support Chinese characters.	Custom	2.1.17.50	4/20/2023
27114, 27140	Enhancement	Parts - "Your Selection" Breadcrumb	Included the status of the part to the "Your Selection" breadcrumb.	Generic	2.1.17.50	4/20/2023
27222	Enhancement	Import - Custom FTP based import	Restricted import of data from certain brands.	Custom	2.1.17.50	4/20/2023
27227	Enhancement	Reports - Attribute Filter	Modified the PDP sort and Filter sort fields on the Attribute Filter to capture the sort order value at a web category + web subcategory + part description + attribute + attribute UOM combination level if the Attribute UOM column is enabled in the Attribute Filter report for that PMT.	Generic	2.1.17.50	4/20/2023
27231	Enhancement	Parts - Additional Parts Info	Enabled the "Core Part Number" field on the Additional Parts Info page of the PMT	Custom	2.1.17.50	4/20/2023
27237	Enhancement	Exports - ACES and PIES XML	Modified the Submission Type field to retain the custom values which were being removed after every deployment	Custom	2.1.17.50	4/20/2023

24365	Enhancement	Dashboard	The part count tile on the dashboard is modified to display the values based on the category > subcategory selected to improve the performance of the page. Earlier, the	Generic	2.1.17.49	4/7/2023

RELEASE NOTES

			subcategory was the first level of selection.			
26587	Defect	Reports - Delete Function	A spinner is included to indicate the delete activity is in-progress to the Delete Function report.	Generic	2.1.17.49	4/7/2023
26616	Enhancement	Import - Standard Template (Interchange)	Changes to the excel interchange import functionality to allow import of duplicate records which have the same data across all columns against every duplicated instance.	Generic	2.1.17.49	4/7/2023
26696	Enhancement	Import - Custom FTP based import	A one-time update to overwrite the images received from the Wheel Atlas FTP file.	Custom	2.1.17.49	4/7/2023
26717	Enhancement	Parts - Item Page	Included a checkbox "Is Karmak Inactive" in Parts Segment to identify if the part is active/inactive in the Karmak ERP.	Custom	2.1.17.49	4/7/2023
26718	Enhancement	Parts - Item Page	Included a checkbox " Is Kit" in Parts Segment to identify if the part belongs to a kit.	Custom	2.1.17.49	4/7/2023
26635	Enhancement	Master - Product Line	Changes to the Product Line Master to capture the "ACES Product Name" and "PIES Product Name" fields specific to a product line. Upon importing the data to external (Opticat) portal, the data will be pushed to the line specified in this field (if it already exists in the external portal).	Custom	2.1.17.49	4/7/2023
26362	Enhancement	Parts - Buyers Guide	Changes to the grid displayed on the Buyers Guide and the reports downloaded from the same to display the records as-is from the imported files.	Generic	2.1.17.49	4/7/2023

RELEASE NOTES

26191	Enhancement	Import - Application XML and Exports and Reports	To modify the processing of Application XML import to capture the values imported in the TransElecControlled, HorsePower, KilowattPower fields and changes to the application exports and reports to include the imported values to this field.	Generic	2.1.17.49	4/7/2023
26627	Enhancement	Import - Standard Excel Template (Application)	To modify the processing of Application excel import to capture the values imported in the TransElecControlled, HorsePower, KilowattPower fields.	Generic	2.1.17.49	4/7/2023
25986, 25998	Enhancement	Import - Custom Excel Template (Unit-Component Mapping)	Introduced a new template "Unit-Component Mapping" to upload the unit to component relationship. For the relationship to be updated, both the unit and component parts should belong to the same product line.	Generic	2.1.17.48	4/6/2023
26055	Enhancement	Export - Standard ACES Excel and XML	Changes to component-ACES Export to export only the common fitments from units associated.	Custom	2.1.17.48	4/6/2023
25351	Enhancement	Master - Vehicle (Multi-Add)	Changes to the Multi-add page to display the application information per part#+option& notes combination. The feature is also modified to include a provision to view the applications with holes.	Generic	2.1.17.48	3/24/2023
25061	Enhancement	Parts - Buyers Guide	Buyers Guide Logic Changes to address the incorrect invalids and grouping issues	Generic	2.1.17.48	3/24/2023
22943	Enhancement	Import - Custom Excel Template (Wheel Atlas and Tire Atlas)	The import is updated to process only the net changes of the wheel and tire data from the vendor's location.	Custom	2.1.17.47	3/1/2023

RELEASE NOTES

24260	Defect	Master - All Masters	Included the default value "Select" across all dropdowns in the master pages.	Generic	2.1.17.47	3/1/2023
24499	Enhancement	Import - Custom FTP based import	The custom import functionality to import the Wheel and Tire information upload from an external source is modified to process only the net changes.	Custom	2.1.17.47	3/1/2023
24527	Enhancement	Parts - Custom Parts (Parts Summary) Page	Included a row-wise delete option.	Custom	2.1.17.47	3/1/2023
24531	Enhancement	Code Merge	Migrated the code pertaining to the attribute approval process to generic PMTs.	Generic	2.1.17.47	3/1/2023
24532	Enhancement	Import - Custom Excel Template (Wheel Atlas and Tire Atlas)	An import template to approve/reject conversion of a custom attribute (as-is attribute) to any of the existing standard/custom attribute (to-be attribute) is introduced. Upon approval, the as-is attribute name will be added as an alias to the to-be attribute.	Generic	2.1.17.47	3/1/2023
24533	Enhancement	Reports - Custom Report (Attribute Approval)	A report to export the list of as-is and to-be attributes that were subjected to the approval process is introduced. The report can be exported cutting across part descriptions in PMT.	Generic	2.1.17.47	3/1/2023
24557	Enhancement	Exports - PIES	AIML - Changes to PIES Exports	Generic	2.1.17.47	3/1/2023
24756	Enhancement	Reports - Custom Report (Wheel and Tire Atlas)	Included created date and modified date columns to the Wheel Atlas and Tire Atlas reports.	Custom	2.1.17.47	3/1/2023

RELEASE NOTES

24757	Enhancement	Reports - Parts Segment Report	Customization to the Parts Segment Report to include the "Catalog Import" and "Catalog Visibility" flags to identify if the part is exported to the web catalog.	Custom	2.1.17.47	3/1/2023
24912	Enhancement	Reports - Oversize Report	A custom report to export the parent SKUs along with the oversize part numbers along with the oversize information and a set of customer specific attributes is introduced.	Custom	2.1.17.47	3/1/2023
24931	Enhancement	Master - Freight	Updated the freight functionality to capture 0 value in the price related fields	Custom	2.1.17.47	3/1/2023
24932	Enhancement	Master - Warranty	Updated the warranty functionality to allow negative warranty \$ values.	Custom	2.1.17.47	3/1/2023
24991	Enhancement	Import - Custom Excel Template (Warranty)	Provision to capture the ZZ8 and CR8 price types in included	Custom	2.1.17.47	3/1/2023
25079	Defect	Parts - Buyers Guide	Increased the time set for timeout to prevent the OOPS message being displayed.	Generic	2.1.17.47	3/1/2023
25095	Enhancement	Import - XML Import Processing	A custom import template to specify the required parts and their associated brand and product line information to generate the custom ACES/PIES XML file with the details of the specified parts is introduced.	Custom	2.1.17.47	3/1/2023
25101	Enhancement	Parts - List All	Parts duplication functionality is extended to Interchange, Digital Assets, and Extended Info segments which was previously restricted to Description, Attributes, and Package segments.	Generic	2.1.17.47	3/1/2023

RELEASE NOTES

25216	Enhancement	Export Data	Included the Brand Name in the exported filename. When multiple brands are selected for export, the same will be indicated by the term "MultiBrand".	Generic	2.1.17.47	3/1/2023
25333	Defect	Import - Standard Excel Template (Digital Assets)	The Effective date and Expiration date fields are made optional which was previously set to conditional mandatory.	Generic	2.1.17.47	3/1/2023
25359	Enhancement	Import - Processing of Application Excel Import	Import customization to reject the application records that are not already available in PMT is implemented.	Custom	2.1.17.47	3/1/2023
25452	Enhancement	Import - Processing of Parts Import	Import logic changes to create the ERP# as the part number in PMT when a supplier XML file containing the supplier# (which is mapped to the ERP#) is imported.	Custom	2.1.17.47	3/1/2023
25479	Enhancement	Import - ACES XML	Fixed the issues with the Transmission base and Steering system tags having both id and names in the imported file.	Generic	2.1.17.47	3/1/2023
25484	Defect	Parts - Attributes Page	Upon adding/editing a custom attribute, the default value for the Attributes UOM field will be set to "Select" instead of displaying a specific UOM from the available units.	Generic	2.1.17.47	3/1/2023
25488	Enhancement	Export Data - PIES	The unit/component-based export functionality that is available for the standard ACES reports is extended to the PIES export. Depending upon the selection, the PIES information specific to the unit/component parts can be exported.	Generic	2.1.17.47	3/1/2023
14775	Enhancement	Reports - Unassigned Parts	Changes to Unassigned Parts Report to reorganize the columns in the template for better clarity.	Generic	2.1.17.46	1/31/2023

RELEASE NOTES

22683	Enhancement	Parts - Digital Assets	Included an alert message to indicate the digital asset import via Parts UI will consume longer time upon bulk upload of physical assets.	Generic	2.1.17.46	1/31/2023
23216	Defect	Parts - Digital Assets	Fixed the issues with the Asset Height/Width & UOM fields which had issues saving the values entered via the UI.	Generic	2.1.17.46	1/31/2023
23239	Enhancement	Reports - Parts Segment	The Parts Segment-wise Report is extended to other PIES segments which was previously limited to Attribute and Brand reports.	Generic	2.1.17.46	1/31/2023
23442	Enhancement	Reports - Custom Report (Modern Engine Template)	Migrated the custom report available in the old instance of the PMT to the new instance.	Custom	2.1.17.46	1/31/2023
23590	Enhancement	API	APIs for Kits, Hazardous and Multi Level Custom Category Segments is introduced.	Generic	2.1.17.46	1/31/2023
23746	Defect	Exports - PIES Excel	Standardized the columns reported in the Digital Assets segment of the PIES report to match the order of columns in the import template.	Generic	2.1.17.46	1/31/2023
23782	Enhancement	Import - Standard Excel (Attribute)	The Attribute excel template is modified to capture the line code column to allow data across the product lines to be imported at once.	Generic	2.1.17.46	1/31/2023
23968	Enhancement	Exports - To FTP	Included an option to export the data from PMT to an FTP location via console.	Custom	2.1.17.46	1/31/2023
24116	Enhancement	Import and Reports - Custom (Custom Parts)	Updated the Custom Parts Import and Reports to capture the new BC Size Code = FRE. The Parts section is also updated to display and include this new value.	Custom	2.1.17.46	1/31/2023

RELEASE NOTES

24143	Enhancement	Import and Reports - Custom (Custom Parts)	The custom parts import template and the report is updated to include additional user defined price types and the associated core price columns.	Custom	2.1.17.46	1/31/2023
24234	Enhancement	Imports - Custom Excel Template (ERP to Vendor Mapping)	The custom template is updated to include the Core SKU column to capture the core# associated with the ERP#.	Custom	2.1.17.46	1/31/2023
24234	Enhancement	Parts - Additional Parts Info	Option to view/modify the Core SKU# associated with the ERP# is included to the Additional Parts Info page.	Custom	2.1.17.46	1/31/2023
24234	Enhancement	Reports - Custom Report (ERP to Vendor Mapping)	The custom report is updated to include the Core SKU column to capture the core# associated with the ERP#.	Custom	2.1.17.46	1/31/2023
24316	Enhancement	Dashboard	For users with queue management enabled, the live status update will be processed via queue which will update the count across all product lines. For other users, the status can be updated per product line.	Generic	2.1.17.46	1/31/2023
22107	Enhancement	Export Data - All Applications	Included an additional column to indicate if the application record associated with the part is ACES, Non-ACES, or ACES-Invalid.	Generic	2.1.17.45	1/3/2023
22313	Enhancement	Export Data - PIES	Reorganized and renamed the fields (excluding space characters) in the PIES export to match the corresponding import templates. The extra columns available on the exports are retained in the last few columns.	Generic	2.1.17.45	1/3/2023
22925	Enhancement	Database configuration	A console to purge the audit logs in the server on a scheduled frequency is set up.	Generic	2.1.17.45	1/3/2023

RELEASE NOTES

22984	Enhancement	Excel Import - Price	Included the Line Code column in the Price templates to permit the import of data across multiple product lines at once.	Generic	2.1.17.45	1/3/2023
22985	Enhancement	Excel Import - Digital Assets	Changes to the processing of Digital Assets Template to allow imports based on LineCode.	Generic	2.1.17.45	1/3/2023
23001	Enhancement	Database configuration	An import configuration to permit the files based on Brand AAIAID or the LineCode is included at the PMT level.	Generic	2.1.17.45	1/3/2023
23002	Enhancement	Dashboard - Live Status Update	For the PMTs with Queue Management, the live status update - either scheduled or manual will be handled via the queue console based on the priority set.	Generic	2.1.17.45	1/3/2023
23618	Enhancement	Reports - Parts Segment Report	Changes to the Parts Segment Report to capture the already available list of reports in a drop-down instead of radio buttons.	Generic	2.1.17.45	1/3/2023
22926	Enhancement	Parts - All segments	Modified the "Your Selection" breadcrumb on the Parts segment to display the ERP# mapped with the supplier part.	Custom	2.1.17.45	1/3/2023
22950	Enhancement	Parts - Search by Part#	Modified the "Your Part#" search filter on the Parts segment to permit searches either through the vendor part# or the ERP part#.	Custom	2.1.17.45	1/3/2023
22991	Enhancement	Import - Custom Excel Template (ERP to Vendor Mapping)	Introduced custom import template to capture the mapping between ERP# and Vendor part#.	Custom	2.1.17.45	1/3/2023
23067	Enhancement	Import - Custom Import Processing	Changes to the XML and Excel import process to permit the import of Vendor parts which are available in the ERP# to Vendor# mapping table.	Custom	2.1.17.45	1/3/2023

RELEASE NOTES

23068	Enhancement	Reports - Custom Report (ERP to Vendor Mapping)	Introduced custom report to extract the mapping between ERP# and Vendor part# added to the PMT.	Custom	2.1.17.45	1/3/2023
23277	Enhancement	Import - Custom Import Processing	Custom import process to automatically create a part in PMT for a particular Parent Brand ID.	Custom	2.1.17.45	1/3/2023
23549	Enhancement	Import - Custom Import Processing (HDA)	Custom import process to pushing HDA data to appropriate PMT Tables and UI through the queue console.	Custom	2.1.17.45	1/3/2023
23557	Enhancement	Master - Custom Master (ERP to Supplier Mapping)	A custom master screen to view the ERP code to Supplier code mapping.	Custom	2.1.17.45	1/3/2023
23612	Enhancement	Import - Custom Excel Template (Tire Atlas)	Updated the custom excel import process for the tire data to permit the selection of a product line.	Custom	2.1.17.45	1/3/2023
22797	Defect	Parts - Digital Assets	Fixed the issues with editing the Watermark field in the Digital Asset page of the Parts section.	Generic	2.1.17.45	1/3/2023
22838	Defect	Parts - Digital Assets	Fixed the issues with uploading the PDF assets using the Digital Asset page of the Parts section.	Generic	2.1.17.45	1/3/2023
22851	Defect	Excel Import - PIES Notes	Modified the field size limitations for the description code "MTP" to match the AutoCare standards.	Generic	2.1.17.45	1/3/2023
23121	Defect	Excel Import - Application	Addressed the issues with including " and ' in the Notes column of the Application import template.	Generic	2.1.17.45	1/3/2023
23122	Defect	Excel Import - Parts, Package, Interchange and Attribute	Fixed the formatting issues with the Part# and related fields, GTIN/UPC and Attribute Data fields in the Parts, Package,	Generic	2.1.17.45	1/3/2023

RELEASE NOTES

			Interchange and Attribute templates.			
23139	Defect	Export Data - Custom Exports	Fixed the issues with downloading custom XML files.	Custom	2.1.17.45	1/3/2023
